# SEAS

## Silicone Edge Automated Stitching

**AWARD WINNING SYSTEM**  
2018 SGIA Product of the Year

SEAS is a revolutionary system for SEG Keder sewing. Our sewing solutions, with three different levels of automation, were developed to increase the productivity of operation and meet clients' different expectations.

Following the market closely and realizing the exponential growth of the use of Tension Fabrics with SEG Keder, we've developed three

revolutionary solutions to increase productivity and quality in this area:

The SEAS system (Silicone Edge Automated Stitching).

The SEAS solutions are the result of a strong investment in Research & Development, backed by real-world feedback from our customers.

SM Optima  
+SEAS

# A Semi-Automatic SEG Keder Sewing System

Increase your productivity  
and quality in an easy and efficient way

The SM Optima +SEAS is a highly productive semi-automatic sewing machine composed by a high-end lockstitch sewing machine, a SEAS Universal Kit and an optimized sewing table for easy handling of large textiles.

This system was developed to be as easy to use as possible and to be easily moved across the factory floor when necessary.

With low maintenance and high reliability, this is a turnkey solution to start or increase your presence in the fast-growing Silicone Edge Graphics industry.

# Book your demo now!

Learn more about our machines in person or online. Our team is at your disposal to show our SEG finishing technologies in real time.

## Why book a demo?

- We can run the demo with the textiles you want.
- Schedule the demo when works best for you.
- There's no commitment!
